Publication Title:

Folder-type mobile communication terminal having double-sided LCD

Abstract:

1567 Abstract of EP1231757

A folder-type mobile communication terminal having a double-sided LCD includes a first LCD panel, a second LCD panel, and a backlight device, which is interposed between the first and second LCD panels, for bi-directionally illuminating the first and second LCD panels, wherein the backlight device includes a light emitting diode for emitting light and a light guide plate for distributing the light emitted from the light emitting diode to the first and second LCD panels.
